Index performance returns do not reflect any fees, transaction costs, expenses or taxes.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the latest month end is available at <https://www.flexshares.com/us/en/individual/funds>. It is not possible to invest directly in an index.

FlexShares shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00 pm EST Net Asset Value. Beginning July 1, 2024, market price performance is determined using the closing price on the primary exchange. Prior to July 1, 2024, market price performance was determined using the bid/ask midpoint at 4:00pm EST, when the NAV is typically calculated. Market price returns do not represent the returns you would receive if you traded shares at other times.

Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. This includes Treasuries, government-related and corporate securities, mortgage-backed securities, asset-backed securities and collateralized mortgage-backed securities.

30-Day SEC Subsidized Yield reflects the dividends and interest earned during the period, after the deduction of the fund's expenses. This is also referred to as the "standardized yield."

30-Day SEC Unsubsidized Yield does not reflect fee waivers in effect.
