FUND CHARACTERISTICS

Average Market Cap (\$)	424,775,103,566
Weighted Average Beta	1.01
Price to Earnings	24.95
Price to Book	6.53
SEC Subsidized Yield	1.77%
SEC Unsubsidized Yield	1.77%

The **30-Day SEC Subsidized Yield** is computed under an SEC standardized formula based on net income earned over the past 30 days. It is a "subsidized" yield, which means it includes contractual expense reimbursements and it would be lower without those reimbursements. It may also include an inflation adjustment that can cause the yield to vary substantially from one month to the next. The **30-Day SEC Unsubsidized Yield** calculation is also computed under the same SEC standardized formula based on net income earned over the past 30 days, but excludes contractual expense reimbursements, resulting in a lower yield. It may also include an inflation adjustment that can cause the yield to vary substantially from one month to the next.

Index performance returns do not reflect any fees, transaction costs, expenses or taxes.

Performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed or sold in the secondary market, may be worth more or less than the original cost. Investors will incur usual and customary brokerage commissions when buying or selling shares of the exchange-traded funds ("ETFs") in the secondary market, and that, if reflected, the brokerage commissions would reduce the performance returns. Current performance may be lower or higher than the performance shown. Shares are bought and sold at market price not net asset value ("NAV") and are not individually redeemable from the fund. For the most recent month-end performance, please visit the Fund's website at www.flexshares.com or call 855-353-9383 for more information.

Index performance does not represent FlexShares fund performance. It is not possible to invest directly in an index. All performance figures assume reinvestment of dividend and capital gains at net asset value; actual returns may differ. Performance 1-year and less are cumulative; performance over 1-year are average annualized total returns. Market price performance is determined using the bid/ask midpoint at 4:00pm Eastern time, when the NAV is typically calculated. NAV price performance is determined using the daily calculated NAV. They do not represent the returns you would receive if you traded shares at other times. Performance figures do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or upon redemption or sale of fund shares. The fund inception date is generally several days prior to when the fund begins trading. NAV prices are used to calculate market price performance prior to 07/14/2016, when the fund first traded on an exchange.

Effective 06/01/2021, the name of the fund and the name of the underlying index have been changed to FlexShares STOXX[®] Global ESG Select Index Fund and STOXX[®] Global ESG Select KPIs Index. Northern Trust Investments, Inc. ("NTI" or the "Adviser") has contractually agreed to reimburse a portion of the operating expenses of the Fund (other than Acquired Fund Fees and Expenses) to the extent the "Total Annual Fund Operating Expenses" exceed 0.42% until March 1, 2024. Performance would have been lower without fee waivers and expense reimbursements in effect.

STOXX Global ESG Select KPIs Index offers exposure to a set of global, developed-market companies that is tilted towards companies scoring better with respect to a select set of environmental, social, and governance (ESG) key performance indicators (KPIs).

MSCI World is a market cap weighted stock market index of 1,655 stocks from companies throughout the world.

FlexShares STOXX® Global ESG Select Index Fund (ESGG) is passively managed and uses a representative sampling strategy to track its underlying index. Use of a representative sampling strategy creates tracking risk where the Fund's performance could vary substantially from the performance of the underlying index. The Fund is subject to environmental, social and governance (ESG) Investment Risk, which is the risk that because the methodology of the Underlying Index selects and assigns weights to securities of issuers for non-financial reasons, the Fund may underperform the broader equity market or other funds that do not utilize ESG criteria when selecting investments. The Fund is also at increased risk of industry concentration, where it may be more than 25% invested in the assets of a single industry. Investments in foreign market securities involve certain risks such as currency volatility, political and social instability and reduced market liquidity. To the extent that the Fund invests in Emerging markets, those investments may be subject to increased price volatility and may be more susceptible to adverse economic, market, political or regulatory occurrences affecting that country, market, industry, sector or asset class. The Fund may also invest in derivative instruments. Changes in the value of the derivative may not correlate with the underlying asset, rate or index and the Fund could lose more than the principal amount invested.
