FLEXSHARES EXCHANGE TRADED FUNDS

[MUSIC PLAYING] The FlexShares High Yield Value-Scored Bond Index Fund, or HYGV, aims to provide investors the investment benefits of high yield bonds through maximizing the value factor, utilizing a contemporary credit evaluation process in screening for liquidity. We build the underlying index for the HYGV fund through a four-step process. First, we attempt to maximize the index's exposure to value by taking into account individual issuer's valuation, spread analysis, and solvency. Next, we determine our own issuer quality score based on management efficiency, solvency, and profitability.

From there, we determine the issuer's liquidity by reviewing the individual's securities age, time to maturity, and the issuer's overall amount of debt outstanding. Finally, we optimize the indexes by applying controls on key criteria, such as minimum absolute constraints on individual bonds, issuers, and sectors, as well as constraints on duration, credit score, liquidity score, and turnover. The index is then reconstituted on a monthly basis. To learn more about the FlexShares High Yield Value-Scored Bond Index Fund, visit [FlexShares.com/funds/HYGV](https://flexshares.com/funds/HYGV).
