FUND CHARACTERISTICS

Average Market Cap (\$)	61,540,785,191
Price to Earnings	28.70
Price to Book	3.13
SEC Subsidized Yield	2.11%
SEC Unsubsidized Yield	2.11%

The **30-Day SEC Subsidized Yield** is computed under an SEC standardized formula based on net income earned over the past 30 days. It is a "subsidized" yield, which means it includes contractual expense reimbursements and it would be lower without those reimbursements. It may also include an inflation adjustment that can cause the yield to vary substantially from one month to the next. The **30-Day SEC Unsubsidized Yield** calculation is also computed under the same SEC standardized formula based on net income earned over the past 30 days, but excludes contractual expense reimbursements, resulting in a lower yield. It may also include an inflation adjustment that can cause the yield to vary substantially from one month to the next.

Extraordinary performance is attributable in part due to unusually favorable market conditions and may not be repeated or consistently achieved in the future. Performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed or sold in the secondary market, may be worth more or less than the original cost. Investors will incur usual and customary brokerage commissions when buying or selling shares of the exchange-traded funds ("ETFs") in the secondary market, and that, if reflected, the brokerage commissions would reduce the performance returns. Current performance may be lower or higher than the performance shown. Shares are bought and sold at market price not net asset value ("NAV") and are not individually redeemable from the fund. For the most recent month-end performance, please visit the Fund's website at www.flexshares.com or call 855-353-9383 for more information.

Index performance does not represent FlexShares fund performance. It is not possible to invest directly in an index. All performance figures assume reinvestment of dividend and capital gains at net asset value; actual returns may differ. Performance 1-year and less are cumulative; performance over 1-year are average annualized total returns. Market price performance is determined using the bid/ask midpoint at 4:00pm Eastern time, when the NAV is typically calculated. NAV is determined using the daily calculated NAV. They do not represent the returns you would receive if you traded shares at other times. Performance figures do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or upon redemption or sale of fund shares. The fund inception date is generally several days prior to when the fund begins trading. NAV prices are used to calculate market price performance prior to 11/24/2015, when the fund first traded on an exchange.

Northern Trust Investments, Inc. ("NTI" or the "Adviser") has contractually agreed to reimburse certain expenses (other than Acquired Fund Fees and Expenses) to the extent the "Total Annual Fund Operating Expenses" exceed 0.57% until March 1, 2022. NTI also has contractually agreed until March 1, 2022 to waive a portion of its Management Fees and/or reimburse certain expenses in an amount equal to the Acquired Fund Fees and Expenses attributable to the Fund's investments in the Underlying Fund(s). Performance would have been lower without fee waivers and expense reimbursements in effect.

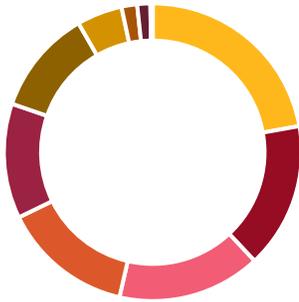

Northern Trust Real Assets Allocation Index is designed to reflect the performance of a universe of inflation sensitive securities operating in the following sectors: global infrastructure, global real estate and global natural resources.

MSCI All Country World Index is a market capitalization weighted index designed to provide a broad measure of equity-market performance throughout the world.

Before investing, carefully consider the FlexShares investment objectives, risks, charges and expenses. This and other information are in the prospectus and summary prospectus, copies of which may be obtained by visiting www.flexshares.com. Read the prospectus carefully before you invest.

Forside Fund Services, LLC, distributor.

An investment in FlexShares is subject to numerous risks, including possible loss of principal. Fund returns may not match the return of the respective indexes. A full description of risks are in the prospectus and summary prospectus.

The Fund is subject to commodity exposure risk, the risk of investing in economies that are susceptible to fluctuations in certain commodity markets. The Fund is subject to counterparty risk, which is the risk that a counterparty to a financial instrument may default on its payment obligation to an Underlying Fund. Investments in foreign and emerging market securities involve certain risks such as currency volatility, political and social instability and reduced market liquidity. The Fund's investments are concentrated in the securities of issuers in a particular market, industry, sector or asset class. The Fund may be subject to increased price volatility and may be more susceptible to adverse economic, market, political or regulatory occurrences affecting that market, industry, sector or asset class. The Fund may also invest in derivative instruments. Changes in the value of the derivative may not correlate with the underlying asset, rate or index and the Fund could lose more than the principal amount invested. An investment in the fund is subject to the risks associated with the underlying funds in which it primarily invests.

Price to Earnings is calculated as a company's current stock price divided by its earnings per share. Price to Book is calculated as the market value of all common stock shares of a company divided by the book value of the company.
