

FlexShares STOXX® Global Broad Infrastructure Index Fund (NFRA)

FlexShares STOXX® Global Broad Infrastructure Index Fund attempts to provide investors with a global equity portfolio consisting of companies that offer the inflation-hedging, income and total return potential of infrastructure ownership.

STEP ONE

Define Universe

Generate at least 50% of revenues from the following super-sectors / sectors:

ENERGY

- Energy Utilities
- Midstream Energy

UTILITIES

- Waste Management
- Water Utilities

COMMUNICATIONS

- Cable & Satellite
- Data Centers Wireless
- Wireless Towers
- Wireline

GOVERNMENT OUTSOURCING / SOCIAL

- Hospitals
- Postal Services
- Correctional Facilities

TRANSPORTATION

- Air Transportation
- Passenger Transportation
- Rail Transportation
- Road Transportation
- Water Transportation

*3-month average daily trading volume
of at least \$1 million USD*

STEP TWO

Weight the Index

Weighted based on free-float market cap, with the following constraints:

Maximum of
40 constituents from
each super-sector

Maximum number of
companies per sector
is 40 / n*

Maximum
of 5% in any
individual security

Maximum
of 30% in
any super-sector

Maximum
of 40% in
any country

Reconstituted annually; Rebalanced quarterly

** n = number of sectors in super-sector*

An investment in FlexShares is subject to numerous risks, including possible loss of principal. Fund returns may not match the return of the respective indexes. A full description of risks is in the prospectus.

FlexShares STOXX® Global Broad Infrastructure Index Fund (NFRA) is passively managed and uses a representative sampling strategy to track its underlying index. Use of a representative sampling strategy creates tracking risk where the Fund's performance could vary substantially from the performance of the underlying index along with the risk of high portfolio turnover. It is subject to infrastructure-related companies risk and MLP risk. Risks associated with infrastructure-related companies include: realized revenue volume may be significantly lower than projected and/or there will be costs overruns; infrastructure project sponsors will alter their terms making a project no longer economical; macroeconomic factors such as low gross domestic product ("GDP") growth or high nominal interest rates will raise the average cost of infrastructure funding; government regulation may affect rates charged to infrastructure customers; government budgetary constraints will impact infrastructure projects; and special tariffs will be imposed. Investments in foreign market securities involve certain risks such as currency volatility, political and social instability and reduced market liquidity. To the extent that the Fund invests in Emerging markets, those investments may be subject to increased price volatility and may be more susceptible to adverse economic, market, political or regulatory occurrences affecting that country, market, industry, sector or asset class.
